

Need for cybersecurity

Presently industries are intensively technology-dependent, thereby systems & databases require advanced countermeasures to maintain the integrity of their databases & systems. Globally companies are experiencing an increasing number of cyber threats such as phishing, malware, ransomware, denial of service, man in the middle, crypto jacking, SQL injection among others on a daily basis.

Databases stored overcloud or on-premises both poses a threat of possible intrusions, thus detecting and preventing such threat is a must, industries require cognitive and sophisticated cybersecurity countermeasures instilled into their systems covering every possible cyber threat vulnerability. Developments in cybersecurity technology have picked up pace in recent times utilizing artificial intelligence and machine learning. However, the threats one receives are also growing dynamically with time, thus creating a void for future development in preventive cybersecurity countermeasures.

Online retail is yet another industry that is growing its penetration globally among shoppers, with an increasing number of online retailers and their wide range of products on offer makes them highly vulnerable to cyber threats. Any company involving cybersecurity measures needs to stay updated and timely upgraded to prevent and detect possible cyber threats as these threats pose risk towards a company's IT infrastructure, databases, assets, and operational continuity.

Cyber-crime today has become a business, and the hackers are looking for real dollars, & this business is expanding day by day. Various businesses, big or small fall into this trap every day

How Can You Keep Yourself Safe

Check Website Url

Think before you click

Check Emails Before Opening Them

Think before you open

Remember To Log out

If you are using a public computer, please remember to log out

Choose Strong Passwords

Use Toolsbug easy to remember password generator

Shop Safety In Trusted Websites

Research retailers online to make sure they're legitimate.

Update Your Antivirus

The anti-virus updates contain the latest files needed to combat new viruses and protect your computer. These signature files are released daily, and sometimes even more often.

Affordable Cybersecurity Solution for Your Online Business

1. **Cybersecurity Employee Training**
2. **Developing policies and procedures**
3. **Ransomware Protection**
4. **Phishing protection**
5. **Tech support scam protection**
6. **Cyber Insurance and Assurance**
7. **Email security**
8. **Attack Simulation & defense**
